

With all of the styles, sizes and options available for bin storage systems, it can be a challenge to choose the right one for your application. This guide will help you through the process by providing some basic information that may be helpful to select a storage system, including details on construction, weight capacities and other features.

**Louvered Panel Systems:**

Steel panels with rows of punched louvers. Typically used to hang an assortment of bins for high-density storage or point-of-use workstations. Bins can be picked from while on the panel or removed for remote use. Some assembly required on most items.

**Wall Mounted Units:**

Flat panels are available in many sizes, can be fastened to walls to keep items out of the way, off the floor and off the work table.

**Bench Top Models:**

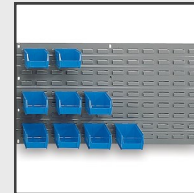

Bench racks are used on work tables to keep parts within easy reach.

**Floor Standing Models:**

**Single-Sided:** Single-sided units can be placed against a wall to save floor space.

**Double -Sided:** Double-sided units allow picking from both sides.

**Mobile Units:** Mobile systems allow for quick relocation of the unit.

**Wire and Steel Shelving Systems:**

These units typically have higher weight capacities than the louvered panel systems mentioned above, and any size or type of bin can be used on the shelves. Traditional steel shelving is least expensive; chrome plated wire shelving is more attractive and collects less dust. Mobile option available on some wire shelving systems.

**Pick Rack Systems:**

Sloped shelves keep shelf bins, indicator bins, drawers and system bins at an angle so parts stay at the front of the bin for easy picking. Available in single-sided, double-sided, mobile or bench rack.

**Rail Systems:**

Constructed of individual steel rails that span between uprights. Used most commonly to hang bins for convenient parts retrieval. Rails are spaced during assembly according to bin sizes being used.

An economical storage system option.

Mobile casters and handle kit available (G2804304) for Double Sided Rack only (G0786947).
